ORDER (please use the sample sheet)

THE FOLLOWING OPTIONS ARE AVAILABLE, PLEASE INDICATE YOUR CHOICE ON THE SAMPLE SHEET:

- **RNA-Seq**, Sequencing of the transcriptome, starting with the creation of cDNA
- **DGE**, Digital gene expression

RESULTS (I would like to receive my results as following)

- Courier:**
(see pricelist for additional costs)
- alignment files on DVD(BC-111)
 Sequence data on Hard disc (BC-112)

BASECLEAR

FOR 100% DNA RESULTS

SAMPLES

All samples sent to BaseClear must have a completed order form included.

RNA

The quality of the RNA samples will be checked in BaseClear, the RNA must have a RIN value of 8.0 or greater. We need at least a total of 10 ug of RNA to perform the analysis. Always send any prepped material on dry-ice to baseclear and by courier.

SAMPLE NAMING

All samples should have a unique sample-name by which you can identify the sample. This name will also be used in the filenames of the results for easy identification. Make sure you use short filenames.

TERMS OF DELIVERY

The genome analysis service includes a quality check on incoming DNA and RNA samples. In cases when samples do not pass our criteria, we will notify you before continuing with sequencing. Depending on the client's choice of analysis a guaranteed quantity of sequence data will be provided, For internal reference and control, a standard reference sample is always included on each sequencing run. If the sequence data to be analysed is to be aligned against a reference sequence this must be provided by the customer. Also when, due to client mistakes, additional work has been performed and/or extra costs have been made, BaseClear has the right to charge the client for those cost.
